

Distributed Ledger Technology Workshop

Challenges and perspectives in the technological, scientific, social and economic fields

February 1st 2018
Università degli Studi di Perugia

at Università dei Sapiori - Via Montecoroneo 45, Località Montebello 06126 - Perugia

Distributed Ledger Technology (DLT) is a consensus of replicated, shared, and synchronized digital data geographically spread across multiple sites, countries, or institutions, with no central administrator or centralised data storage.

The success of DLT has led to fascinating research along multiple interesting lines from pure technology to economic and social science. This workshop aims to bring together interested scholars from all relevant disciplines who study DLTs and their surrounding ecosystems. The primary goal is to foster discussion and cross-fertilisation of ideas among experts in different fields related to DLTs, and thus advance the national and international state-of-the-art.

Programme

- 09:00 Introduction and opening of works (in italian)
- 09:15 Technical Sessions 1 and 2 (in english)
- 14:10 Technical Session 3 (in italian)
- 16:30 Tavola rotonda - Sfide e prospettive per DLT (in italian)

Chairs

Prof. Stefano Bistarelli, Direttore Nodo UniPG CINI Cyber Security National Lab - Università degli Studi Perugia

Prof. Gianna Figà Talamanca, Università degli Studi di Perugia

Programme Committee

- Prof. Leonardo Aniello, University of Southampton
- Prof. Massimo Bartoletti, Università degli Studi di Cagliari
- Prof. Stefano Bistarelli, Direttore Nodo UniPG CINI Cyber Security National Lab - Università degli Studi Perugia
- Prof. Gianna Figà Talamanca, Università degli Studi di Perugia
- Prof. Maurizio Pizzonia, Università degli Studi Roma Tre
- Prof. Andrea Vitaletti, Università degli Studi di Roma "La Sapienza"
