

PhD Program in Agricultural, Food, and Environmental Science and Biotechnology

Coordinator: Prof. Roberto Buonauro – e-mail: roberto.buonauro@unipg.it

Department of Agricultural, Food, and Environmental Sciences

The International PhD Programme in “Agricultural, Food, and Environmental Science and Biotechnology” (AFESB) at the University of Perugia includes two curricula: “Food crop and animal productions” and “Environment and Sustainable production systems”. The three-year program is set to provide PhD candidates with specialised professional training in Agricultural Crop Systems, Animal Science and Technology, Economics and Rural Appraisal, Food Technologies and Biotechnologies, Land Surveying and Mapping, Microbiology, Pedology, Plant Biochemistry and Physiology, Plant Genetics and Molecular Biology, Plant Protection, Water resource management. The PhD programme includes lectures, tutorials, seminars, and methodology classes. In addition, it offers training in both oral and written communication skills, thereby including scientific writing and publishing abilities, as well as participation in international conferences or workshops.
