along with a statement on behalf of the director of the organization hosting the student.

From the second year, each graduate student is awarded extra funds for research (limited to the approved financial resources), both in Italy and abroad; these funds are additional to the scholarship the amount of which is determined for each program for a total of 10% of the gross year amount of the agency, except for financial additions on the allotted operational funds within the administrative department of the program.

The Doctoral program scholarship is taxable for social security "INPS a gestione separata" as per art. 2, comma 26, of Law 8 August 1995, no.335 and subsequent modifications and integrations, in the following percentages: two-thirds in charge of the administration and one third of the student.

Scholarships funded by other universities or public entities can be limited to specific research areas. The scholarships which fall in this category will oblige the student to focus on these areas in compliance with the conditions foreseen in the agreement. The Board of Teachers will be tasked with verifying that these conditions are met.

For the Research Doctoral Programs established and activated in virtue of cooperation agreements with other prestigious and internationally renowned universities and foreign research entities as per art. 10 of D.M. 45/2013, the norms relating to the scholarships will be defined in the agreements.

The norms in the present Call are not applicable to foreign students or beneficiaries of financial aid in specific mobility programs for which there is specific regulation.

The scholarships for Doctoral Programs cannot be utilized in conjunction with other scholarships granted for whatever reason, with the exception of those granted by national or foreign institutions for the purpose to complete the recipients' research and learning activity training in the programs.

Those who are recipient of a scholarship, even if only partially, to attend another doctoral program at any other Italian University cannot be granted another.

#### **Art.8**

##### **Fees to access and attend the program**

The doctoral students who are not recipients of either scholarships or doctoral research grants must pay fees in the amount established each year by the Administration Council after having received the Academic Senate's approval.

The doctoral students who are recipients of a scholarship and have either lost the right to the scholarship or have renounced for whatever reason, will be exempt from fees.
