Jean Monnet Centre of Excellence “Rights and Science”/ R&S

“Atelier” is an initiative of the Jean Monnet Centre of Excellence “Rights and Science”, funded by the Education, Audiovisual and Culture Executive Agency (EACEA) of the European Union.

The Centre of Excellence is aimed to develop the academic activities related to the legal and societal aspects of Science and Innovation.

These aspects are considered as dimensions of the European integration process, especially in the development of the “European Research Area”. Research and Innovation matters also offer opportunities to share and exchange experiences with other countries, especially with Latin America.

The Centre of Excellence “Rights and Science” coordinates the research and teaching activities at the Università degli Studi di Perugia related to other EU projects such as the Jean Monnet Chair “TeKla”, the Jean Monnet Chair “SWING”, the Jean Monnet Module “EuPlaw”, the Horizon 2020 MSC-Rise “BeFOre” (which is led by CNR-ISAFoM).

The Centre of Excellence “Rights and Science” is based on the cooperation of the Università degli Studi di Perugia (the Department of Experimental Medicine, the Department of Economics and Department of Law), with the Consiglio Nazionale delle Ricerche (ISAFoM), and several European and Latin American Universities (in particular: the Tecnológico de Monterrey, Campus de Ciudad de México; the Universidad de Alcalá de Henares, Madrid; the Universidad Autónoma de Baja California; the University of Brighton; the Universidad de Buenos Aires; the Universidad de la Frontera, Chile; the University of Malta; the Universidad del Norte, Colombia, the Technische Universität München; the Escuela Libre de Derecho; the De Montfort University; the Universidad CEU Cardenal Herrera; the Universidad de Valencia; the J.J. Strossmayer University, Osijek).

Events of the “Atelier” 2016

“Atelier” is an annual programme of events and teaching activities organised by the Centre of Excellence “Rights and Science” in order to establish a permanent forum for discussing the relationships between Science and Law, and to disseminate the results of the research activities carried out in the framework of the Centre and under the other Projects such as “BeFOre”.

The 2016 edition includes **5 Sessions** which will be put in place in Perugia **from May to July 2016**.

Lecture Series “Law and Science”

The Responsibility of the Researchers

The Lecture series of the Centre of Excellence are aimed to debate about the relationships between Research, Innovation and Society.

The 2016 Lecture is focused on the legal consequences arising from the Research activities.

In particular, the Science as freedom and its legal limits will be examined in order to respect the other fundamental freedoms. Thus scientists and jurists will identify some hypothesis of liability arising from the research activities (in particular, with respect to the prediction of natural disasters, the biomedical research, the access to genetic resources).

This session makes part of the activities of the project “BeFOre” – Horizon 2020, in order to present the interim results of the research.

“European Infrastructures and Research Programmes”

The political strategy “Europe 2020” underlines the need to improve the links between research and infrastructures in order to provide the European Union with a solid growth.

In particular, the Framework Programme Horizon 2020 funds a specific Programme, in the pillar “Excellent Science” with the aim to “develop and support excellent European research infrastructures and assist them to contribute to the ERA by fostering their innovation potential, attracting world-level researchers and training human capital, together with the related Union policy and international cooperation.”

The seminar is focused on the presentation of the EU initiatives concerning the infrastructures for the period 2014-2020 and on the experiences of the previous programming.

Session 5

Course on

Ethical and Legal Issues of Research and Innovation

The University staff involved in research activities needs to be trained on the legal and ethical aspects of the research activities.

The training in those matters is necessary not only for the researchers and technicians directly requested to carry out the experimental activities, but also for the administrative staff, that needs to receive a constant training on matters such as the contractual aspects in the research, management of EU research programmes, and in the civil and administrative liability of the scientific research.
