

Disattivare “Posta in arrivo evidenziata” in Outlook Web App (OWA)

The screenshot shows the Outlook Web App interface in a Mozilla Firefox browser. The address bar displays the URL <https://outlook.office.com>. The main interface includes a search bar, navigation tabs for 'Nuovo' and 'Contrassegna tutti come letti', and a left-hand navigation pane with folders like 'Posta in arrivo' (15 items) and 'Bozze' (3 items). A yellow callout bubble points to 'Posta in arrivo' with the instruction: "1. Cliccare su 'Posta in arrivo'".

The 'Evidenziata' (Highlighted) view is active, and a dropdown menu is open under the 'Filtro' button. The menu options include 'Tutti', 'Non letti', 'Inviati a me', 'Contrassegnati', 'Menzioni', 'Ordina per', 'Mostra come', and 'Mostra Posta in arrivo evidenziata'. A yellow callout bubble points to the 'Filtro' button with the instruction: "2. Cliccare su 'Filtro'". Another yellow callout bubble points to the 'Mostra Posta in arrivo evidenziata' option with the instruction: "3. Cliccare su 'Mostra Posta in arrivo evidenziata' per togliere la spunta." A blue envelope icon is also present on the right side of the interface.
